

COMPLIANCE POLICY
for
Restriction of Hazardous Substances (RoHS)
and
Registration, Evaluation, and Authorization of Chemicals
(REACH)

December 3, 2015

Dear Valued Customer;

Bovie Printing and Fabrication produces labels and overlays for use in a wide variety of industries and therefore we are committed to continued compliance to RoHS, WEEE, CONEG and REACH. Since Bovie Screen Process Printing procures the materials – substrates, inks and adhesives – that make up a customer's product, we require that our suppliers provide us with certification stating compliance to these directives.

The European Union Directive 2011/65/EU Restriction on Hazardous Substances (RoHS) is legislation restricting the use of six substances. The substances include Lead (Pb), Mercury (Hg), Cadmium (Cd), Hexavalent Chromium (CR+6), Polybrominated biphenyls (PBB), and Polybrominated diphenyls (PBDE).

The directive allows for a maximum concentration limit of 0.1% by weight in homogeneous material for lead, mercury, hexavalent chromium, polybrominated biphenyls (PBB), and polybrominated diphenyl ethers (PBDE), and 0.01% weight in homogeneous materials for cadmium.

The European Union Directive 1907/2006 regulation on the Registration, Evaluation, and Authorization of Chemicals (REACH) restricts the presence of SVHC's (Substances of Very High Concern) as regulated in the directive.

Our suppliers must submit RoHS and REACH certification when requested by Bovie Printing and Fabrication to meet specified customer requirements. These certifications are then kept on file. Bovie Printing and Fabrication will supply copies of these certificates at any time when requested by a customer. All customer orders requiring RoHS and/or REACH compliance will be accompanied with a Bovie Printing and Fabrication C of C document stating the required compliance.

If you have any questions regarding this document, please feel free to contact me or your inside sales person.

Regards,
Quality Manager
